

General Practice Network

Practice Health Atlas™ Registration of Interest

The Practice Health Atlas™ (PHA) is a decision support tool, designed by the Adelaide Western General Practice Network, for General Practitioners (GPs), Practice Managers and other Practice staff.

As a decision support tool, the Practice Health Atlas™ can be used in at least 3 ways:

- As an information resource
Compare with the GP / Practice's existing knowledge
- For business and clinical systems modelling / re-design
Complete discussion points for topics raised in each section
- To earn RACGP Group 1 points
Apply for the Active Learning Module through the Division

Registering your interest for the PHA means that:

- AWGPN will consult with you about the business and clinical systems in place at your practice, and how they are used.
- AWGPN will take an electronic copy (but with patient name, address except for postcode, and doctors' names excluded) of your clinical database and store it securely at the AWGPN.
- AWGPN will produce a Practice Health Atlas™ for your practice, and provide you with paper and electronic copies as well as a consultation session to explain the contents and outcomes of the Atlas, free of charge.
- You can nominate to be part of the Active Learning Module. AWGPN will contact you to invite you to a first workshop scheduled after the production of your Practice Health Atlas™.
- You agree to use of your completed Practice Health Atlas™ as an example to be shown to others, without your name appearing on it (eg. labelled 'Practice E').

Registration:

Yes, I would like the AWGPN to provide my Practice with a Practice Health Atlas™

I have read the AWGPN Privacy Policy (attached) and understand that my data will not be used other than for the Practice Health Atlas without my permission

I (or at least one of the GPs at this practice) would like to participate in the Active Learning Module to earn RACGP Points related to the Practice Health Atlas™
